

BEST INTERVENTIONAL CASES-SERIES II

Taking Coronary Interventions to Newer Heights

In Partnership with Top International Centres
German Heart Centre, Munich & Heart Centre Luzern, Switzerland

Date: 4th, 5th & 6th June, 2021

Taking Coronary Interventions to Newer Heights

Objective:

BIC 2021 is a unique Virtual Congress in the World where the format is designed for real world case presentations on various topics.

Cardiologist world over have realized that case-based learning provides the best tips and understanding for adopting a new technology or procedure. In addition, it also helps an interventionist to understand the potential traps and their solutions in complex case treatments from their peers.

Key Features of BIC 2021

Date: 4th, 5th & 6th June, 2021

- 200+ interesting case presentations in a 3 days robust scientific agenda highlighting the key takeaways in treating complex cases.
- Multiple halls showing cases simultaneously facilitates the audience to swap sessions of their interest concurrently to maximize use of their time for targeted learning.
- Expert Panel comprising of leading National and International Cardiologists.
- Dedicated case-based sessions on complications in the Cath Labs and bail out strategies.
- As it's an E-platform the case presentation shall be shared on spot by the presenter on live mode.

3 days academic extravaganza covering following therapeutic segments to match to individual interests of participants across globe:

Techniques & Treatment of severely Calcified lesions with IVL

The Road Less Travelled : Chronic Total Occlusions

Hotlines and Innovations in treating left main

Managing Complex PCI's using hemodynamic support

Managing calcified lesion: A never ending challenge

Cath Lab Nightmares: The Night I Didn't sleep

Revisiting Newton's Law; Exerting Ultra High force to create lumen

To stent or Not to stent - How imaging has helped in decision making

Complex case.. Complex decision - Peripheral Artery disease

Breakthrough Technologies that shall redefine the Scope of Complex PCI

Tough Situations don't last Tough people do - How did I bail out?

When going gets tough, tough gets going - Chip Toolbox

Highlights of BIC 2020

The first ever Virtual Conference organised in Interventional Cardiology in May 20

3

Days Academic Extravaganza

250

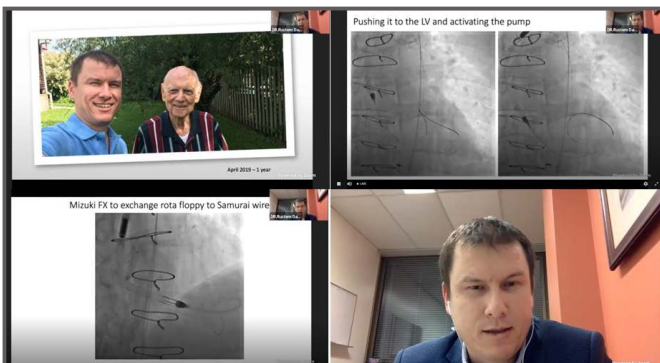

Participants Globally

200+

Case Presentations

1000+

Viewers

Date	Hall A	Hall B
4-Jun	4 pm to 6 pm	
	Techniques & Treatment of severely Calcified lesions with IVL	Complications in Everyday PCI: Missing the Invisible Dragon
	6 pm to 8 pm	
	The Road Less Travelled : Chronic Total Occlusions	What is Right for Left Main ? Unique Challenges
5-Jun	4 pm to 6pm	
	Revisiting Newton's Law ; Exerting Ultra High force to create lumen	To stent or Not to stent - How imaging has helped in decision making
	6 pm to 8 pm	
Breakthrough Technologies that shall redefine the Scope of Complex PCI		
8 pm to 10 pm		
Tough Situations don't last .. Tough people do - How did I bail out?	Hotlines and Innovations in treating left main	
6-Jun	12 pm to 2 pm	
	Complex case .. Complex decision - Peripheral Artery disease	Cath Lab Nightmares: The Night I Didn't sleep
	2 pm to 4 pm	
When going gets tough, tough gets going - Chip Toolbox	Unexpected Complexity in Simple Case: Saving the Titanic	

International Faculty
